AREA OF OPERATIONS

HNC

Colonel

Sebastien P. Joly

Commander, U.S. Army Engineering
& Support Center Huntsville

The U.S. Army Engineering & Support Center Huntsville (**CEHNC**) employs approximately 1,006 Civilian Employees and Military personnel.

CEHNC supports specialized missions that require **unique technical expertise** in programs that are generally **national** or **very broad in scope**. The **Center** supports tasks not normally accomplished by a Headquarters U.S. Army Corps of Engineers element; tasks that require a **centralized management structure**, integrated facilities or systems that **cross geographic division boundaries**; and tasks that require commonality, standardization, multiple-site adaption or technology transfers.

Unlike the Corps' traditional geographically based organizations, the **Center** is not tied to water or other geographic boundaries. Instead, **Huntsville Center** is able to provide **specialized support** to all of the Corps' divisions and districts throughout the world.

**CEHNC CROSSES
